

### TECHNICAL DATA

## **CEDARWOOD OIL VIRGINIA AT 010**

OLFACTIVE NOTE : woody characteristic  
COLOR AND APPEARANCE : light yellow, liquid  
n° CAS :8000-27-9

### DEFINITION

Cedarwood Virginia essential oil is obtained by steam distillation of the wood of *Juniperus virginiana* L from the South-West of North America.

### TECHNICAL PROPERTIES

|   |                      |                                      |
|---|----------------------|--------------------------------------|
| Spécific gravity 20 C° (g/cm <sup>3</sup> ) | : 0,941 - 0,970      |                                      |
| Refractive index 20C°                       | : 1,503 - 1,508      |                                      |
| Optical Rotation                            | : -38 / +14          |                                      |
| Flash point                                 | : >110 °C            | ( Method Pensky Martens DIN 51 758 ) |
| Solubility                                  | : soluble in ethanol |                                      |

### STORAGE

To be stored in a cool, dry place in tightly - closed containers preferably full. Protect from light. When stored for more than 18 months , quality should be checked before use.

### CAUTION

Concentrated product for industrial use avoid contact with eyes and mucous. Do not drink.

This data is based on information believed to be reliable. The values were determined immediately after manufacture of the product. Alterations can result due to improper transport and/or improper storage. The certificate does not release the user from the responsibility of undertaking his own tests of the characteristics of the product and its suitability in the intended application.
